SUMMARY

AI technology leader with 21 years across telecom, banking and retail, building AI that holds up in production, under regulation and in many languages. At Jio I lead JioBharatIQ, a voice-first agentic AI assistant built for 400M+ users in 12+ Indian languages, owning delivery across app, backend, AI verticals, information security and legal compliance. At Apptad I took a GenAI master-data platform from client workshops and pre-sales through delivery, saving $1.5M+ a year. I bring 13 years in regulated banking at ANZ, Commonwealth Bank and HSBC, and experience leading teams and vendor ecosystems of up to 100+ people.

Target roles: Director of AI · Senior AI Manager · AI Manager · Senior Technical Manager – AI · Chief AI Officer

CAREER HIGHLIGHTS

- **$1.5M+ a year saved** by decommissioning Informatica MDM across 8+ source systems (Apptad).
- **Source onboarding cut from 6+ weeks to 5 business days**; **50M+ records migrated with zero loss** (Apptad).
- **Regulatory batch cut from 4 hours to 28 minutes**; **late submissions down 30%** (Commonwealth Bank).
- **100+ member multi-vendor ecosystem** managed; query scan volume **cut by 90%** in a cloud migration (ANZ).
- **DPDP compliance and Responsible AI guardrails** led for consumer agentic AI in finance and health (Jio).

CORE SKILLS

AI Leadership: AI Strategy & Roadmap · AI Product Management · AI Governance · Use-case Discovery · Client Workshops · Pre-sales · Stakeholder & Vendor Management · Team Leadership

GenAI & Agentic AI: Agentic AI · Multi-Agent Systems (Google ADK) · LLMs · RAG · MCP · Voice AI · Conversational AI · Multilingual NLP · Prompt Engineering · LLM Gateways & Model Routing · LangChain · LlamaIndex · Vector Databases (Qdrant, OpenSearch) · Amazon Bedrock · MLOps

Responsible AI & Security: Guardrails · DPDP Act Compliance · PII Masking · Prompt-Injection Defence · AI Red-Teaming · LLM Evaluation · Consent & Data Privacy · Zero Trust · IAM

Cloud & Data: GCP (GKE, BigQuery) · AWS (EMR, S3, RDS, EKS, SageMaker) · Azure (Databricks, MLflow) · Apache Spark · Kafka · Snowflake · Master Data Management · LiveKit WebRTC/SIP

Delivery: SAFe PI Planning · Program Management · Release Management · Regulatory Reporting (APRA)

EXPERIENCE

Jio Platforms Limited

May 2026 – Present

Senior Technical Manager – AI Products & Platform · Bengaluru & Mumbai

JioBharatIQ: voice-first agentic AI assistant built for 400M+ Jio users in 12+ Indian languages. End-to-end delivery owner across app, backend, AI verticals, information security and legal; lead a 17-member iOS, Android and backend team.

- **Platform:** shaped a lean architecture with the Architecture and DevOps teams: Google ADK multi-agent orchestration, agentic RAG on Mem0 and Qdrant, MCP skills and an LLM gateway routing across Gemini, Claude and GPT tiers.
- **Cost and speed by design:** 3-path routing designed so 60% of queries need no LLM call, targeting ~10x lower average latency and 30–40% lower model cost; semantic caching; voice isolated so call spikes do not slow AI services.
- **Voice for India:** LiveKit WebRTC in the app plus a telephony line, so users can reach the assistant from any phone; response design targets a visible reply within 2 seconds on 2G/3G networks.
- **AI verticals:** lead delivery of Astrology & Devotion, Health & Wellness, Cricket, Entertainment & News, commerce and finance, each an MCP skill with its own agent, guardrails and quality bar, under a 4-layer partner trust framework.
- **Responsible AI:** defined domain guardrails (finance gives market information but never buy/sell advice; health explains symptoms but never prescribes) with pre- and post-LLM filters targeting zero critical incidents and under 1% false blocks.
- **Compliance and security:** led DPDP Act compliance with Legal and external advisors, covering PII classification, masking rules and the guardrail approval process; own app security from client to service mesh.
- **Delivery:** run SAFe PI planning, sprint governance, App Store and Play Store releases, feature flags and crash analytics.

Apptad Inc
Nov 2023 – Feb 2026

Senior AI Product Owner & Technical Program Manager – GenAI Platform (AEVAH) · Noida

GenAI-powered master data management platform on AWS, replacing Informatica MDM and Teradata for a Fortune 500 heavy-equipment manufacturer. Led a 30+ member team.

- **Saved $1.5M+ a year** in licensing by decommissioning Informatica MDM and moving 8+ source systems to Apache HOP metadata-driven pipelines.
- **Cut new-source onboarding from 6+ weeks to 5 business days (70%)** with no hardcoded pipelines: the LLM detects intent, MCP orchestrates, guardrails approve, and Spark on EMR returns a data-quality score and suggested match and survivorship rules for governance approval.
- **Migrated 50M+ golden records with zero loss** from Teradata to S3 using Spark on EMR, with a **40% throughput gain** over legacy batch.
- **Consulting and pre-sales:** ran client workshops and AI use-case discovery with the client's CTO, shaped the AI onboarding use case, supported pre-sales, then delivered it.
- **AI engineering decisions:** OpenSearch vector search for entity resolution and RAG-based governance explanations; evaluated LangChain and LlamaIndex and chose a custom MCP layer for compliance and auditability.
- **Security and delivery:** PII masking, prompt-injection prevention, schema-validated LLM function calls and Zero Trust AWS; ran a 200+ story backlog across 6 SAFe PI cycles.

Commonwealth Bank of Australia
May 2022 – Sep 2023

Senior Product Owner & Program Manager – Data & Regulatory Transformation · Bengaluru

- **Cut nightly batch from 4 hours to 28 minutes (88%)** by owning the roadmap for the SQL-to-Spark migration of 15+ regulatory reporting workflows.
- **Reduced late regulatory submissions by 30%** through KPI-driven governance across a 30+ member team.
- Architected the Snowflake platform for APRA audit compliance: 90-day Time Travel, Zero Copy Cloning, Dynamic Data Masking and Row Access Policies.

ANZ Bank
Jul 2013 – May 2022

Senior Technical Program Manager – Data & Cloud Transformation · Bengaluru, Australia, China

- Progressed from Senior Business Analyst to Technical Manager; **managed a 100+ member multi-vendor ecosystem** (IBM, Wipro, TCS, Infosys, Cognizant).
- Led the Teradata-to-BigQuery migration: **query scan volume down 90%**, analyst query time from 45 seconds to under 3 seconds.
- Delivered the Global Asset Finance collections analytics platform for EMI default prediction and recovery, **cutting manual effort by 60%**.

Accenture
Aug 2011 – Jul 2013

Team Lead – Data Engineering & Analytics · Client: Target Corporation

- Built and led a 13-member data engineering team; delivered a data warehouse for 500+ business users across 4 releases.

Earlier career: Technical Project Lead, IBM (client: Walmart), 2010–2011 · Senior Software Engineer / Technical Lead, HSBC, 2007–2010, Best Employee of the Year 2009 · Informatica Developer, Effigent India, 2005–2007

OPEN SOURCE

Kavach-Eval (2026): AI red-teaming kit that tests whether AI assistants leak secrets or customer data under attacks in Hindi, Hinglish, Odia and Tamil versus English; judge-free scoring and a CI release gate.

Vismriti (2026): DPDP-ready consent, purpose-bound retrieval and verifiable right-to-erasure for RAG and AI agents, with signed deletion certificates and an MCP server.

CERTIFICATIONS & EDUCATION

PMP – Project Management Professional, Project Management Institute · Valid Jan 2025 – Jan 2028

SAFe 6.0 POPM – Product Owner / Product Manager, Scaled Agile Inc · Valid Sep 2024 – Sep 2027

Bachelor of Engineering – Information Technology, Biju Patnaik University of Technology · First Class · 2001–2005

Languages: English · Hindi · Odia
