Malaya Kumar Swain

Senior Technical Manager – AI | Agentic & Voice AI Platforms | Responsible AI & DPDP | AI Consulting & Pre-sales
Bengaluru & Mumbai, India · +91-8763132804 · swain.malayaku@gmail.com · https://www.linkedin.com/in/malayakumarswain

SUMMARY

AI technology leader with **21 years** across telecom, banking and retail. At Jio I lead **JioBharatIQ (JBIQ)**, a voice-first agentic AI assistant built for **400M+ Jio users in 12+ Indian languages**. I own delivery end to end: app, backend, AI verticals (Kundali, Health, Cricinfo, JioMart, Jio Finance), **Information Security and Legal**. With the Architecture and DevOps teams I shape a lean platform: Google ADK multi-agent orchestration, agentic RAG, MCP skills, LiveKit voice and cost-aware model routing. I defined JBIQ's **Responsible AI guardrails** and led **DPDP Act compliance with Legal and KPMG**. Before Jio, I ran **client workshops, AI use-case discovery and pre-sales** for AEVAH, a GenAI MDM platform that cut source onboarding by **70%** and saved **$1.5M+ a year**. 9 years at ANZ, plus CBA, HSBC, IBM and Accenture. PMP · SAFe 6.0 POPM · CBAP.

CORE SKILLS

AI & GenAI: Agentic AI · Multi-Agent Systems (Google ADK) · LLMs · RAG · MCP · Voice AI · Conversational AI · Multilingual NLP · Prompt Engineering · Vector Databases (Qdrant, OpenSearch) · Mem0 · LangChain · LlamaIndex · Amazon Bedrock · OpenAI API · LLM Gateways & Model Routing

Responsible AI & Security: Pre/Post-LLM Guardrails · Domain Safety Policies · DPDP Act Compliance · PII Masking · Prompt-Injection Defence · Zero Trust · IAM · Istio mTLS · WAF

Architecture & Cloud: GCP (GKE, Cloud SQL) · AWS (EMR, S3, RDS, EKS, SageMaker) · Azure (Databricks, MLflow) · Apache Spark · Kafka · Temporal · LiveKit WebRTC/SIP · React Native

Leadership & Delivery: AI Strategy · Use-case Discovery · Client Workshops · Pre-sales · SAFe PI Planning · Stakeholder & Vendor Management · Release Management · PMP

EXPERIENCE

Jio Platforms Limited (JPL)

May 2026 – Present

Senior Technical Manager – AI Products & Platform · Bengaluru & Mumbai, India

JioBharatIQ (JBIQ) · Voice-first agentic AI assistant for 400M+ Jio users · 12+ Indian languages · End-to-end owner: app, backend, AI verticals, InfoSec & Legal · 17-member team

Platform & Architecture

- **Shaped a lean JBIQ architecture with the Architecture and DevOps teams:** Google ADK multi-agent orchestration (supervisor plus domain agents, crash recovery, human-in-the-loop), agentic RAG over Mem0/Qdrant and a 1,232-signal user profile, MCP skills for partner actions, and an LLM gateway routing across Gemini, Claude and GPT tiers.
- **Drove lean-by-design decisions:** 3-path routing (Fast Path, Skill-Direct, Agentic) designed so 60% of queries need no LLM call, targeting ~10x lower average latency and 30–40% lower model cost; semantic caching; voice isolated in its own VPC and GKE cluster so call spikes never slow the AI services.
- **Extended voice beyond the app:** LiveKit WebRTC in-app plus a telephony line (Kamailio SBC → LiveKit SIP/SFU), so users can reach JBIQ from any phone.
- **Progressive response design** gives a visible reply within 2 seconds on 2G/3G; signed JioAirSync OTA ships P0 fixes in under 4 hours with automatic crash rollback.

AI Verticals & Ecosystem Integrations

- **Lead delivery of Kundali (Astrology & Devotion), Health & Wellness, Cricket (Cricinfo), Entertainment & News, JioMart commerce and Jio Finance**, each built as an MCP skill with its own agent, guardrails and L0–L3 quality bar.

- **4-layer partner trust framework** for 1P/2P/3P skills: human approval through the Partner Portal, schema validation, CSP sandboxing and signed OTA bundles.

Responsible AI, Information Security & Legal

- **Defined domain guardrails:** Finance gives share and market information but never buy/sell advice; Health explains symptoms but never prescribes medicines. Dual pre- and post-LLM filters (input, output, domain, cultural) target zero critical incidents and under 1% false blocks.
- **Led DPDP Act compliance with Legal and KPMG:** classified PII, set masking rules and defined the guardrail approval process.
- **Own app security:** zero-secrets client (JioID auth, encrypted MMKV storage), TLS 1.3, WAF and Cloud Armor at the edge, Istio mTLS between services.

Delivery Leadership

- **Lead a 17-member CoreUX team (iOS, Android, Backend):** SAFe PI planning, sprint governance, App Store and Play Store releases, feature flags and crash analytics.

Apptad Inc

Nov 2023 – Feb 2026

Senior AI Product Owner & Technical Program Manager – GenAI Platform (AEVAH) · Noida, India

AEVAH · GenAI-powered MDM platform on AWS replacing Informatica MDM & Teradata · Fortune 500 heavy-equipment manufacturer · 30+ member team

Consulting & Pre-sales

- **Ran client workshops and AI use-case discovery with the CTO** to find where GenAI adds value in MDM; shaped the AI-assisted source-onboarding use case and **supported pre-sales** for the AEVAH program.

AI Solution

- **Designed the AI onboarding flow:** a Business Analyst submits a source system and sample file; the LLM detects intent, MCP orchestrates, the guardrail layer approves, and Spark on EMR profiles the data against our rule sets, returning a data-quality score, suggested fixes and match/merge/survivorship rules for governance approval.
- **Cut new-source onboarding from 6+ weeks to 5 business days (70%)** with no hardcoded pipelines; evaluated LangChain and LlamaIndex and chose a custom MCP layer for compliance and auditability.
- **OpenSearch vector search** for semantic entity resolution and RAG-based governance explanations across 50M+ golden records.
- **AI guardrails:** PII masking, prompt-injection prevention, schema-validated LLM function calls and RBAC-controlled tool execution.

Platform & Delivery

- **Zero-loss migration of 50M+ golden records** from Teradata to S3 (raw, curated, golden layers) with Spark on EMR; 40% throughput gain over legacy batch.
- **Decommissioned Informatica MDM** by moving 8+ source systems to Apache HOP metadata-driven pipelines, saving **$1.5M+ a year** in licensing.
- **Zero Trust AWS security** (VPC isolation, IAM least privilege, KMS, Secrets Manager, CloudTrail); ran a 200+ story backlog across 6 SAFe PI cycles.

Commonwealth Bank of Australia (CBA)

May 2022 – Sep 2023

Senior Product Owner & Program Manager – Data & Regulatory Transformation · Bengaluru, India

- **Owned the roadmap for the SQL-to-Spark migration** of 15+ regulatory reporting workflows; cut nightly batch from 4 hours to 28 minutes (88%).
- **Architected the Snowflake platform for APRA audit compliance:** Zero Copy Cloning, 90-day Time Travel, Dynamic Data Masking, Row Access Policies and CDC Streams & Tasks.
- **Reduced late regulatory submissions by 30%** through KPI-driven governance across a 30+ member team.

ANZ Bank

Jul 2013 – May 2022

Senior Technical Program Manager – Data & Cloud Transformation · Bengaluru · Australia · China

- **Progressed from Senior Business Analyst to Technical Manager;** managed a 100+ member multi-vendor ecosystem (IBM, Wipro, TCS, Infosys, Cognizant).
- **Led the Teradata-to-BigQuery migration:** cut query scan volume by 90% and analyst query time from 45 seconds to under 3 seconds.
- **Delivered the Global Asset Finance collections analytics platform** for EMI default prediction and recovery; cut manual effort by 60%.

Accenture

Aug 2011 – Jul 2013

Team Lead – Data Engineering & Analytics · Client: Target Corporation

- **Built and led a 13-member data engineering team;** delivered a data warehouse for 500+ business users across 4 releases.

EARLIER CAREER

Technical Project Lead · IBM · Client: Walmart — *Aug 2010 – Jul 2011*

Senior Software Engineer / Technical Lead · HSBC · Best Employee of the Year 2009 — *Nov 2007 – Jul 2010*

Informatica Developer · Effigent India — *May 2005 – Oct 2007*

CERTIFICATIONS

PMP – Project Management Professional · Project Management Institute (PMI) — *Valid: Jan 2025 – Jan 2028*

SAFe 6.0 POPM – Product Owner / Product Manager · Scaled Agile Inc — *Valid: Sep 2024 – Sep 2027*

CBAP – Certified Business Analysis Professional · IIBA

IBM Certified Solution Developer · InfoSphere DataStage v8.5

EDUCATION & LANGUAGES

Bachelor of Engineering – Information Technology · Biju Patnaik University of Technology, Odisha · First Class — *2001 – 2005*

Languages: English · Hindi · Odia
